

SOLDIER FOR LIFE TRANSITION ASSISTANCE PROGRAM JOB LEAD

DATE OPEN: 7/18/2016

DATE CLOSE: Until Filled

Job title: Senior HVAC Mechanic

Location: Richmond, Virginia

Company: Not listed

SALARY: \$36,517 to \$45,000

SKILLS/DUTIES: Under general supervision from the HVAC Supervisor, the incumbent performs the following work: diagnoses complex problems as they relate to HVAC systems; repairs and maintains heating, air-conditioning, and ventilation systems to include assemblies, disassembles, and installs components associated with these systems; tests, adjusts, and calibrates pneumatic, electronic, and electrical control systems associated with HVAC systems. The employee also performs routine equipment boiler room tours and safety checks.

SUPERVISORY RESPONSIBILITIES:

This position will not supervise other associates.

EDUCATION and/or EXPERIENCE

- Completion of a two-year trade or technical school educational program related to air conditioning functions, such as heating, cooling and ventilating.
- Three (3) or more years of experience working in HVAC as a journeyman.
- Proven considerable work experience successfully using the knowledge and skills required to perform maintenance and repair of HVAC equipment and systems at an advanced level.
- CFC Universal Refrigeration Certification.
- Possession and retention of a valid journeyman tradesman and Virginia driver's license. Successful candidates must have and maintain a driving record acceptable to company and its insurance carriers.

Preferred Qualifications:

- Extensive experience in diagnosing and repairing air conditioning and other apartment building operating systems.
- Virginia journeyman / Master HVAC
- Virginia journeyman / Master Gas Fitters license
